

Ledtrack™

Linear Lighting systems

Designed and Engineered
IN THE USA

Truelite Ledtrack series aluminum profile tracking systems offer very high quality solutions for linear lighting installations, housing LED flexible strip lights or individual modules. Made of extruded anodized aluminum, Ledtrack systems offer huge flexibility for cove, recessed and hidden lighting requirements while affording excellent heat sink capabilities. The Ledtrack systems from Truelite comes with T5 temper profiles made of pure 6063 series aluminum and finished in state of the art manufacturing facilities to offer a industry leading product.

Truelite Ledtrack systems use German made Bayer polycarbonate lighting diffusers as standard across the entire product range. Customers can choose from clear, opal matt and frosted diffusers for different applications. Ledtrack also offers acrylic diffusers for custom specific requirements incorporated into our tracking systems.

Truelite Ledtrack systems also come with appropriate end caps, made of high quality ABS material, for sturdy and tenacious installations. Optional connectors and mounting clips are also offered in stainless steel and ABS material.

Features and Benefits

- » Extruded anodized 6063 aluminum with T5 temper.
- » Excellent heat sink capabilities.
- » Premium Bayer diffusers for long durability and color uniformity.
- » Universal design suits most led flexible strips.
- » Simple, easy and quick installation.
- » Supported end caps and mounting clips accessories.
- » Sturdy and slim profiles.
- » Standard product size is 200cm, custom size up to 300cm.
- » Custom design and shapes available.
